Nitro Price list **Merlin** RC fuel

Special Car model cleaner, Designed to allow cleaning the model during the race without effort, Eliminates foam pneumatic form body shell, displaces moisture, and improves belt life and performance, Should be applied with airgun,

Common Characteristics in our Fuel Range

Filtering System Exclusive high pressure filtering system by 10 microns,

Foam Control Technology; (No foam formation) During running or flying the fuel generates no foam, Very important on racing refuelling,

Metallic Packaging for 2,5 and 5 ltrs,

Quality Control certified by ISO 9001, We perform, at least 3 quality control per batch

Legal disposal Fulfilment: Labelling according to CEE norms, Child proof caps, MSDS Sheets

Lower consumption Our exclusive oil selection, reduces consumption and provides a lower engine temperature

Exclusive Additives; We work with a wide range of additives; High pressure, Friction reducer, lube enhancers, corrosion inhibitors, multi grade compositions, all them carefully selected and tested in our Labs

Continuous Development Glow fuel production, not only requires a high quality level in production process, but a continuous technical actualisation, Our company has specialized laboratories and cooperation agreements with Universities and Tech Centres to continue developing the latest technology products

High demand Production Facility and Integrated ogistics, Our company owns a full integrated production & logistic system that allows us to give a prompt response to market demands
